DETAILED ACTION

1. Claims 9-12 and 14-21 have been examined.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 9-12 and 14-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 9-12 and 14-21 discloses a method of encoding Petri-net into memory associated with cryptological functions. However, Petri-net is well known work-flow model and applying Petri-net to processing systems would impermissibly cover every substantial practical application of, and thereby preempt all use of Petri-net.

Response to Arguments

4. Applicant's arguments filed on 3/22/11 have been fully considered but they are not persuasive.

Based on prior telephone communication with applicant's representative, the examiner has indicated that the amendment may overcome the 101 rejection. However, the examiner was not clear as to whether it would overcome 101 rejection based on statutory subject matter issue or whether it would preempt all application. The examiner has reopened prosecution to indicate that the claims would still pre-empt all use of the Petri-net as it is essentially finite state machine operating cryptographic operations.
